We already know how Quantum mechanics is a difficult and quite often baffling course for students, first and foremost because it's so different than the physics we are used to. Since Sakurai I've rated this textbook just after I've read for my first course in Quantum Mechanics, so perhaps I've been too strict while rating it.

The given expression for Hamiltonian  $H$  is,. Now consider the spin precession to write the Heisenberg's equation of motion for the time dependent operators and . Substitute for , and for  $H$  in the above equation to solve for equation of motion for the time dependent operator . Now using commutator relation rearrange the above equation as follows:. Thus, the Heisenberg's equation of motion ...
