Trane Service Facts

Remove loose debris and overhanging limbs to allow proper air-flow. Schedule seasonal maintenance. Have your air conditioner and furnace checked out before each heating and cooling season to catch problems before it is too late. Change filters regularly. A dirty filter can severely lower your HVAC system's performance.

Literature & Resources - Trane-Commercial

This delta-T measurement is representative of the operating state and relative capacity of the heat pump system. By measuring the change in delta-T, we can determine the need for defrost. The coil sensor also serves to sense out- door coil temperature for termination of the defrost cycle. Termination Temperature.
